# **THE TWO STRUCTURES OF THE LIVING. THE ERASER & THE INKWELL**

**Know yourself. Recognize your  
structure. Connect to  
the sense of Disease.**

**WORKSHOP IN PRACTICAL BIOLOGICAL DECODING  
CHRISTIAN FLÈCHE**

## GENERAL INFORMATION

The practice of therapy for almost 30 years allowed Christian Flèche to discover and then define an extremely simple, verifiable and consistent framework for reading symptoms and the change processes.

It is based on two principles:

# « MORE or LESS ; ADDING or ERASING. »

Everything that is alive, you, me, at each second, at each encounter, at each stimulus, evaluates what it perceives: positive: we seek it; negative: we move away from it.

This notion is a new and easy way to understand all kinds of symptoms, from physical illnesses to behaviors. Everything is biodecoded to be within us, to be us. If you want to change, to optimize healing, your attitude and your therapy will be totally different whether you erase (deafness, forgetfulness...) or you add (tinnitus, hallucination...). Because as you have understood, it is about dealing with the hidden cause of the problem, the structure, without staying in the content, or in the story.

# « A man can do what he wants, but he cannot want what he wants. »

A. Einstein.

## THE TRAINER

### Christian Flèche

Christian Flèche is of a paramedic background in nursing. He does not come from the world of psychology, but from that of biology: the functioning of the human body. Diseases are metaphors of our needs, our emotions, our life experiences.

From encounter to encounter: Marc Fréchet, the work of M. Erickson, some elements borrowed from Dr. Hamer, Christian Flèche developed a form of listening to the symptom: biological, cyclical, trans-generational. He and Philippe Lévy created new protocols, making Biological Decoding an original method of emotional diagnosis, as well as a new form of Brief Therapy.

Christian Flèche is Master Practitioner in NLP, Practitioner in Metaphors, author of 17 books, 2 audio CDs. Founder in 1993 of Biological Decoding, trainer since March 1994, he is now Pedagogical Director of the French School of Biological Decoding.: «Bio Décodage Pratique®» and of the International School of Biological Decoding: « Santé Libre ».

# THE BIODECODING® SCHOOL

The growing interest in the approach proposed by **Biodecoding®** lead to an innovative teaching structure aimed at optimally transmitting skills and diffusing its techniques in France and abroad: «Ecole Française de Décodage Biologique Pratique – Christian Flèche».

As proposed by the school, since 1994, **Biodecoding®** integrates theoretical and practical elements in a brief therapy approach that is solutions-oriented with simple and powerful protocols.

Its originality and strength come from its permanent references to biology, observation and the ability to evolve thru continuous self-assessment and enhancements.
